

This training equips Solution Architects with essential knowledge of the Cumulocity IoT platform, its architectural principles, and core components. Participants will gain deep insights into the Cumulocity domain model, Digital Twin Manager, and various integration interfaces, enabling them to design scalable IoT solutions. The course also covers key Cumulocity applications and best practices, preparing architects to make informed decisions in implementing enterprise-grade IoT solutions.

Duration: 3 hours

Achievements: Exam Pass Certificate

Learner Profile

- Solution Architects

Required Knowledge

No requirements

Next Steps

- Cumulocityexpert courses

Learning Objectives

- Cumulocity Platform
- Architecture
- Cumulocity Domain Model
- Digital Twin Manager (DTM)
- Integration Interfaces
- Streaming Analytics Overview
- Applications Overview

Activities

- Learning Videos & Demos
- Hands-On-Labs
- Exam
