

This course provides a comprehensive introduction to the Cumulocity Data Broker feature, enabling you to efficiently share data between tenants or from edge devices to cloud tenants. Through practical use cases and hands-on demonstration, you'll learn how to configure and implement data sharing strategies across your environment. The course covers the complete data broker workflow, from initial setup to successful transmitting between data source and target system.

**Duration:** 20 min

**Achievements:** Attendance Badge

#### **Learner Profile**

Device Integrators  
Cumulocity  
Administrators

#### **Required Knowledge**

Basic Cumulocity  
Knowledge

#### **Next steps**

Cumulocity Device  
Integrator course  
Cumulocity  
Administrator course

#### **Learning Objectives**

- Introduction
- Use Cases
- Configuration
- Demo

#### **Activities**

- Learning Videos & Demos
