Analytics Builder allows you to build analytic models in a graphical environment by combining pre-built blocks. This eLearning covers information on pre-built blocks available in the palette of the model editor which are not covered in the Cumulocity IoT Professional course.

Duration: 45 min

Achievements: Attendance Badge

Learning Objectives

- Input & Output
- Aggregate
- Calculation
- Flow Manipulation
- Utility

Activities

- Learning Videos & Demos

Learner Profile

- Solution Architect
- Analytics Specialist
- Developer

Required Knowledge

Cumulocity IoT Basic Understanding

Next Steps

Expert modules in the categories:
- Analytics
