

This training on advanced security covers essential security features for the Cumulocity platform. You will learn how to set up secure device connections using MQTT certificates and implement single sign-on (SSO) for user authentication. The course also teaches secure login methods and how to manage and revoke certificates when needed. By the end, participants will understand how to protect IoT devices and user access in Cumulocity environments.

Duration: 5 hours

Achievements: Exam Pass Certificate

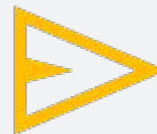

Learner Profile

Solution Architect
Developer
Administrator

Required Knowledge

Cumulocity Basic
Understanding
Security with
Cumulocity Platform

Next steps

Cumulocity Export
Course in the category:
Platform

Learning Objectives

- MQTT Device Certification Authentication
- SSO
- OAI Secure Login Mode
- Certificate & SSO Improvements
- Certificate Revocation

Activities

- Learning Videos & Demos
