The Cumulocity IoT OEE (Overall Equipment Effectiveness) App helps you to measure the efficiency of your manufacturing processes by continually measuring machine availability, performance and quality. With this deep dive training, you learn how to best leverage these insights to improve your production process. After an introduction to the general concepts and usage of the OEE app, the training covers how to define calculation profiles and production lines in the Cumulocity IoT OEE App.

Learning Objectives

- What is OEE
- General Concepts
- OEE for a Machine
- Matching Step – Configuration
- Organizational Units
- OEE for Production Lines
- Integration with MES

Duration: 90 min   **Achievements:** Attendance Badge

Activities

- Learning Videos & Demos

Learner Profile

- Solution Architect
- Business User

Required Knowledge

Cumulocity IoT Basic Understanding

Next Steps

Cumulocity IoT Professional Course
