

The Application Builder is an open-source solution to create your own IoT application in a no-code environment. In the training, you will get a general overview and you learn how to build your own application and its layout to tailor your needs. A number of demos show how you apply this knowledge.

Duration: 85 min

Achievements: Attendance Badge

Learner Profile

- Solution Architect
- Frontend Developer

Required Knowledge

Cumulocity IoT Basic Understanding

Next Steps

- Cumulocity IoT Professional Course
- Expert modules in the categories:
 - IoT Solutions

Learning Objectives

- What is Application Builder
- Application Builder App Creation
- App Layout Customization
- Widget Catalog
- Dashboard Catalog
- Simulators
- Advanced Topics

Activities

- Learning Videos & Demos
